Adnan Sarhan

Sar, Bahrain · adnanm2002@outlook.com · +973 33097092 · github.com/adnan2002

Introduction

Adnan Sarhan, I am a Software Engineering graduate from the University of Bahrain, specializes in backend development using Python (Flask), JavaScript/TypeScript (Node.js), and Java (Spring), along with frontend frameworks like React and Angular. I am experienced in cloud technologies (AWS), CI/CD pipelines, DevOps strategies, and scalable application development, with skills in prompt engineering and mobile technologies such as React Native and Ionic.

Internships

The Benefit Company Seef, Bahrain
IT Infrastructure and Networking Jul 2024 - Aug 2024

- Gained hands-on experience with enterprise-grade physical firewalls and network switches, contributing to the security and reliability of systems serving over 1.3 million users.
- Worked with SolarWinds for proactive network monitoring, performance optimization, and troubleshooting to ensure seamless operations.
- Acquired in-depth knowledge of Cisco Identity Services Engine (ISE), including its role in network access control (NAC) and securing critical resources.

AWS CIC Program Bahrain Financial Harbor, Bahrain
Software Architect & Developer Oct 2024 - Jan 2025

- Designed and developed QuestAI, a cloud-based AI platform for automated exam creation, serving the Ministry of Education.
- Enhanced contextual accuracy by integrating Retrieval-Augmented Generation (RAG) for embedding relevant content.
- Built a responsive React-based frontend and implemented infrastructure-as-code using Serverless Stack (SST).
- Leveraged AWS services, including Amplify and Cognito (authentication), API Gateway and Lambda (backend), DynamoDB (database), S3 (storage), Polly (text-to-speech), Transcribe (speech-to-text), Bedrock (AI models), and SNS (notifications).

Projects

QuestAI *SST, AWS Lambda, AWS Bedrock, AWS DynamoDB, AWS Transcribe, AWS Polly*
Developed a cloud-based, AI-powered platform to assist the Ministry of Education in creating exams aligned with national competency standards.

StudyAI *React.js, Flask, AWS S3, AWS DynamoDB*
Designed an AI-powered platform tailored for University of Bahrain students, providing customized study aids and resources.

Magnolia *Ionic, Angular, Firebase*
Developed Magnolia, a mobile e-commerce application for a Bahrain-based beauty brand, designed to streamline product discovery and purchases.

Education

University of Bahrain Zallaq, Bahrain
BSc. Software Engineering Sep 2020 - Jan 2025

Skills

Programming Languages:	JavaScript/TypeScript (Node.js), Python (Flask), Java (Spring)
Frontend Frameworks:	React.js, Angular, React Native, Ionic
DevOps:	CI/CD Pipelines, Docker, Kubernetes, Git/GitHub/GitLab
Database:	MySQL, PostgreSQL, DynamoDB, Firebase, MongoDB
Prompt Engineering:	LLMs
Software Development Practices:	Agile Methodologies, Version Control, Automated Testing, Code Review
Soft Skills:	Problem-Solving, Communication, Collaboration, Adaptability
