Ali Hasan Maki

Professional Summary

Software engineer experienced in building secure backend, cloud and full-stack systems for banking and government environments. Skilled in Java, Spring Boot, AWS, React, and containerized microservices. University of Bahrain graduate with a 3.71 GPA, an AWS certification, and a senior project that placed second in a university-wide competition.

Experience

Array Innovation - Software Engineer Intern Feb 2026 - May 2026

- Developed Java 21 and Spring Boot features for the authentication service of a digital banking platform
- Implemented authentication workflows and integrated the service with other digital banking components
- Worked in an Agile team using GitHub, pull requests, daily stand-ups, and task planning

Information & eGovernment Authority (iGA) - Software Engineer Intern Jun 2025 - Dec 2025

- Led the development of EconX, a cloud-based economic data platform that placed second in the University of Bahrain senior project competition
- Conducted regular meetings with business owners to gather requirements and translate them into technical solutions
- Improved government economic reporting processes by reducing reliance on manual Excel-based workflows

Education

University of Bahrain - *Bachelor of Science in Information Systems* | GPA: 3.71 *Sep 2022* - Jun 2026

Reboot Coding Institute - *Diploma in Full Stack Development* *Mar* 2024 - Jul 2026

Projects

Mercato – E-Commerce Microservices Platform

- Architected an e-commerce microservices platform using Java, Spring Boot, Angular, MongoDB, and Docker across five independently deployable services
- Secured all services with JWT authentication and role-based access control enforced at the API Gateway
- Implemented asynchronous inter-service communication using Kafka for domain events
- Built a Jenkins CI/CD pipeline with automated testing, Docker builds, and SonarQube quality gates

EconX – Internal Cloud-Based Economic Data Platform **(Second Place, Senior Project Competition)**

- Architected event-driven serverless data pipelines on AWS using Python for economic data ingestion and processing
- Developed a React and TypeScript dashboard consuming REST APIs to visualize economic metrics and automated reports

Fakebook – Social Network Web Application

- Built a full-stack social network using Go and Next.js (TypeScript) with Docker, implementing session-based authentication, WebSockets for real-time chat, and follower-based privacy controls
- Designed a SQLite database with versioned migrations supporting posts, groups, events, and notifications

Technical Skills

- **Languages:** Java, Go, TypeScript, JavaScript, C#, PHP
- **Frameworks:** Spring Boot, React, Next.js, Angular, Tailwind CSS, Bootstrap
- **Cloud & DevOps:** AWS, Docker, Jenkins, GitHub Actions, SonarQube, Nexus, Ansible
- **Databases:** PostgreSQL, MongoDB, SQLite

Certifications

- AWS Certified Cloud Practitioner
- Microsoft Certified: Power BI Data Analyst Associate
