EXPERIENCES

Software Engineer Intern at Fusion AI: *August 2025 - Present*
Stealth startup creating AI tools to help influencers monetize more effectively

Technical Lead at Mustang Math: *April 2022 - June 2025*
Led Tech Team. Developed and maintained website, discord bots, and tournament tools. Spearheaded COMPOSE, a fully self-contained problem writing and tournament management platform, now used by Stanford and Brown

Freelance Web Developer at Recursive Dragon: *September 2022 - September 2023*
Developed and maintained payment and lesson management platform for advanced CS and math classes.

Non-Trivial Research Fellow: *July 2023 - September 2023*
Won second place ($5000 scholarship) out of 100 fellows (0.5% acc. rate). Built next-gen game-based CAPTCHA. Wrote research paper outlining human verification method that can withstand Artificial General Intelligence (video)

Web Developer at PathCheck: *September 2022 - August 2023*
Updated and maintained the website, drove changes to increase user retention and improve website UI/UX.

Web Developer at LichenProject: *March 2021 - July 2021*
Built a website and photo library platform to connect photographers with First Nations and non-profits.

Instructor at Daily Challenge with CMU Professor Po-Shen Loh: *April 2022 - June 2025*
Used Twitch streaming technology and stand-up comedy techniques to teach 10 advanced math courses (~300 cumulative hours). Held 7 YouTube livesolves of national math contests without seeing problems beforehand.

Summer Program for Applied Rationality and Cognition: *July 2024 and July 2025*
Free fully-funded summer camp for high schoolers (<4% acc. rate), attended twice. Took classes on math, philosophy, psychology, and more. Learned to think about the world differently, had many interesting and thought-provoking conversations.

EDUCATION

University of California, Berkeley
B.S. in Electrical Engineering and Computer Science (EECS)
May 2028

SKILLS

Web Development: JavaScript, Typescript, HTML/CSS, SvelteKit, React, NextJS, Node.js, Deno, WebSocket
Backend Development: Python, Java, PostgreSQL, MySQL, Supabase, Firebase, Google Cloud, Flask, FastAPI
Miscellaneous: Git, LaTeX, Lean, Bash, Linux (Ubuntu), PyTorch, Tensorflow, Canva

AWARDS

Humanity's Last Exam: Submitted a problem that received top marks from reviewers ("Top Problem in its Category" of cognitive science) and earned $500 for being in the top 550 questions on the benchmark (~3,000 PhD-level problems)
GitHub Hackathon: Won Best Demo for Location Game, a dynamic 2D maze game that you navigate by moving around in real life
USA Mathematical Talent Search: Gold Award 10th grade, Silver Award 11th grade
American Invitational Mathematics Exam (AIME) Qualifier x6 (2020-2025)
Coca-Cola Scholarship Semifinalist (1.2% acceptance rate) for outstanding leadership, service, and academics
Washington State Solo & Ensemble 4x qualifier (2x large ensemble, 1x small ensemble, 1x solo marimba)
