EDUCATION & COURSEWORK

University of California, Berkeley – Regents' and Chancellor's Scholar **(GPA: 3.85)** **August 2025 – Present**

Intended Degree: B.A. Neuroscience

Courses: Chemical Structure and Reactivity, Organic Chemistry Laboratory, General Chemistry, Introductory Physics, Calculus II, Calculus I

Skills: Data Analytics, Microsoft Excel & Powerpoint, Python, R, Financial Analysis, Quantitative Modeling, Client Communication, Deliverables, Market and Competitive Analysis, Business Case Development, Executive Presentation, Project Management, Cross-Functional Collaboration

EXPERIENCE

Kite Pharma / Gilead Sciences, Santa Monica, California **June 2026 – Present**

Biotechnology Consultant

- Conducted a comprehensive patient journey and care-pathway analysis for glioblastoma, PMS, and myositis, evaluating treatment patterns, referral pathways, clinical trial participation, and differences between academic and community centers to identify barriers in access to care
- Developed strategic recommendations for Kite Pharma's cell-therapy pipeline by translating patient, provider, and site-of-care insights into opportunities for clinical development, provider education, referral optimization, and future commercial planning.

AltrixBio Inc., Boston, Massachusetts **February 2026 – June 2026**

Pharmaceutical Analyst

- Worked on market research and competitive landscape analysis for AltrixBio. Learned and applied consulting frameworks across 12+ training sessions in market sizing, competitive strategy, and healthcare industry analysis.
- Collaborated with a team of eight analysts to develop a client-ready strategic recommendation, presenting actionable insights to support AltrixBio's business and growth objectives.

HekmaCare Inc., Santa Clara, California **May 2026 – Present**

Chief Product Officer

- Leading product strategy and development of an AI-powered robotic arm with autonomous diagnostic capabilities, integrating stethoscope, ultrasound, EKG, ophthalmology, and other sensor-enabled examinations.
- Conduct customer discovery with physicians, healthcare professionals, and potential partners across clinics, gyms, hotels, and other settings to validate clinical use cases and assess implementation opportunities, to formulate go-to-market strategy..
- Support next-stage growth by preparing for a seed funding round with venture capital investors to accelerate product development and evaluate commercialization as a wellness device versus progression toward clinical trials and regulatory clearance.

Kao Lab @ UCSF Memory and Aging Center, San Francisco, California **October 2025 – Present**

Wet Lab Neurology Researcher & Intern

- Investigating mechanisms linking lysosomal pH dysregulation and granulin dysfunction to Alzheimer's disease pathology using C. elegans neurodegenerative disease models alongside postdoctoral researchers and physicians.
- Conducting confocal fluorescence microscopy experiments to image C. elegans and quantify lysosomal pH–dependent fluorescence, comparing cellular phenotypes across genetic and experimental conditions to assess changes in lysosomal function.
- Performing PCR and agarose gel electrophoresis to amplify and visualize target DNA sequences, verify C. elegans genotypes, and confirm experimental strains prior to downstream phenotypic assays.
- Executing worm lysis and genomic DNA extraction from C. elegans populations to prepare DNA templates for PCR-based genotyping and validation of experimental models.
- Performing Western blot experiments, including protein extraction, gel electrophoresis, membrane transfer, antibody-based detection, and band analysis to evaluate changes in proteins associated with lysosomal function and neurodegenerative pathways.

LEADERSHIP

UC Berkeley Healthcare Consulting Group, Berkeley, California **February 2026 – Present**

Senior Consultant

- Part of team leadership on semester-long consulting projects for various biotechnology, pharmaceutical, medical device, and digital health clients, conducting market research, competitive analysis, product strategy, and data-driven strategic assessments. Past clients include AltrixBio and Kite Pharma. .
- Maneuvered projects from problem definition through final client deliverables, guiding research and analysis, mentoring consultants, and presenting data-driven insights to executives to support product development, market strategy, and growth decisions.

American Red Cross Youth Executive Board, San Jose, California **August 2024 – June 2025**

Silicon Valley Blood Services Coordinator

- Led planning and execution of over 15 community blood drives across the Bay Area by managing a committee of high school students, coordinating logistics, outreach, and partnerships to increase participation. Tracked donor statistics to evaluate drive effectiveness.
- Facilitated blood donation access for 5000+ residents through targeted awareness campaigns and collaboration with local organizations, both non-profits and medical companies, expanding donor engagement and community impact.
- Built partnerships with over 20 local schools and community organizations to scale reach, ensure sustainability, and maximize long-term blood donor impact. Designed and provided blood donation educational curriculum for local middle and high schools.

AWARDS & ACHIEVEMENTS

- UC Berkeley Regents' and Chancellor's Scholarship (2025)
- 2x USA Biology Olympiad Certificate of Merit (2023, 2024)
- 3rd Place at Future Business Leaders of America Bay Sections Conference in Business Management (2024)
