Summary

Founder building at the intersection of software and entrepreneurship. Co-running a software development agency for a year and a half while co-building an AI-powered product from 0 to 50+ registered interested people. Looking to sharpen product-market fit and go-to-market execution.

Founder Experience

Mindle – Co-Founder *Jan 2025 – Present*

- Co-building an AI-powered personal knowledge management ("second brain") product with cofounder Gabriel, from idea to a live beta product.
- Grew to 50+ registered interested people, largely self-enlisted after in-person pitching at events, with users adopting and returning to the product on their own.
- Structured a cofounder vesting agreement and defined the near-term product roadmap (WhatsApp integration, Tasks, MCP integration) based on direct beta tester feedback.

Aliosha System – Co-Founder *Mar 2024 – Present*

- Co-run a full-stack software development agency, operating for a year and a half, delivering custom web platforms, e-commerce systems, and internal tools for small business and community clients.
- Built and shipped production platforms end-to-end (requirements, architecture, development, deployment) using React, Next.js, NestJS, and PostgreSQL.
- Managed client relationships and contracts directly, including a multicultural community platform reaching 150+ active users in 6 months, and payment integrations via Stripe for a recurring-revenue business model.
- Handled legal and operational details for client engagements, including contract drafting and modification agreements in formal Mexican legal Spanish.

Selected Client Projects (via Aliosha System)

- **MATES Community MX:** Built a multicultural community platform in Mexico City (60+ active users in 6 months), including an interactive map with 500+ filterable listings, a business onboarding flow, and a Stripe-based recurring subscription system.
- **SCCLUB & True Hughes BBQ:** Delivered end-to-end e-commerce and reservation platforms for two independent businesses, replacing manual workflows with centralized digital systems, custom CMS and admin tools, and automated order confirmations.

Education

Tecnológico de Monterrey CCM *Aug 2023 – May 2027*

B.S. in Computer Technologies Engineering

- Exchange student, UC Berkeley SCET Startup Semester, Fall 2026
- GPA: 94.22/100 (Enrollment Certificate)
- Languages: English (B2), French (A2)

Technical Skills

- **Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind, HTML, CSS, Webflow
- **Backend:** Nest.js, Python, FastAPI, PostgreSQL, MySQL, Nodemailer, C++, C#
- **DevOps & Deployment:** Vercel, Docker, Git
- **Other:** CI/CD, UX/UI Design, Selenium, Stripe, Resend
