Bowen Hou

bowenhou@berkeley.edu | +1 (609) 786-0125 | https://www.linkedin.com/in/bowen-hou-a86471241/

Education

University of California, Berkeley | GPA: 3.94 — **Spring 2028**
B.S. Chemical Engineering | B.S. Material Science & Engineering | Minor in Data Science | SAT: **1600** — *Berkeley, CA*

Work Experience

Grandage – Zabbix China Distributor — **Jun 2025 - Sept 2025**
Marketing Intern — *Shanghai, China*

- Ensured market access and communication by translating the Zabbix (world's best IT/OT monitoring tool) official website into Mandarin and serving as the primary interpreter for the Zabbix and Grandage founders during high-level conferences.
- Managed the full-cycle execution of Zabbix Conference China 2025, coordinating **$20,000+** in logistics and securing the attendance of **300+** participants and **20+** key industry professionals; curated and interviewed Zabbix & Grandage CEO.
- Partnered with the technology department to provide training for **50+** regional firms on licensed Zabbix monitoring products.

Leadership & Involvement

Berkeley International Consulting — **Sept 2025 - Present**
Strategy Consultant, Project & External Affairs Committee — *Berkeley, CA*

- Optimized Zara and Inditex's chemical testing for its global compliance protocols on a strategic consulting project; led team to establish key frameworks to enhance operational efficiency, supply chain integrity, and holistic integration.
- Assisted with building club's revenue pipeline by securing client relationships and consulting projects through pitching solutions at F500 firms and startups, simultaneously expanding the network by inviting industry leaders to host career fairs.

CalSol - UC Berkeley Solar Car Team — **Sept 2025 – Present**
Solar Subteam Engineer — *Berkeley, CA*

- Engineered and manufactured critical components for CalSol's 11th generation solar array integration, specifically focusing on optimizing weight and structural integrity through lightening hole design in carbon fiber composite.

UC Berkeley Model United Nations - Competitive Travel Team — **Sept 2025 - Present**
Competitive Delegate — *Berkeley, CA*

- Represented the UC Berkeley Travel Team, **ranked No. 12** in North America, competing at premier collegiate Model United Nations conferences worldwide and sharpened skills in debate, collaboration, negotiation, political policy drafting and leadership.
- Assisted staffing committee at UCBMUN, one of the most prestigious collegiate conferences on the West Coast, and BearMUN, the premier high school conference attracting **>500** delegates.

TEDxPRISMS Youth — **Oct 2023 – Oct 2024**
Founder, Curator — *Princeton, NJ*

- Founded and directed TEDxPRISMS Youth with official TEDx licensing in partnership with the Princeton Public Library and PRISMS; curated and managed the event for **>100** attendees and oversaw operational and promotional logistics of **$5000+**.

PRISMS Model United Nations Travel Team — **Sept 2021 – May 2025**
Founder, Head Delegate — *Princeton, NJ*

- Founded school's inaugural MUN team and competed at 8 total conferences, managing logistics and funding for team (**$20,000+**).
- Recognized as Honorable Delegate at the Princeton MUN Conference (**1500+** participants), school's first major Model UN award.

Research & Academics

Landry Lab at UC Berkeley, Department of Chemical and Biomolecular Engineering — **Dec 2025 – Present**
Undergraduate Research Assistant — *Berkeley, CA*

- Conducting meta-analyses on lipid nanoparticle (LNP) compositions to determine biodistribution drivers and the cell uptake of drug, focusing on creating a comprehensive database of in-vivo LNP applications.

The Singh Center for Nanotechnology, University of Pennsylvania — **Aug 2024 – Present**
Researcher, First author of publication — *Philadelphia, PA*

- Conducted graduate-level nanotechnology research on Quantum Dot Solar Cells (QDSCs) under the guidance of Dr. Gyuseok Kim at Penn, attaining professional expertise in cleanroom processing techniques.
- Coordinated the publication process with Penn Engineering and was designated the **First Author** for research published in IEEE (Institute of Electrical and Electronics Engineers), focusing on enhancing nanotechnology education via project-based learning.
- Presented research findings at the 53rd IEEE Photovoltaic Specialist Conference and secured the Best Poster award in "PV Deployment, Policy and Sustainability," achieving top recognition among **20+** researchers and **300+** conference attendees.

Skills

Languages: English, Mandarin | **Skills:** AutoCAD, Onshape, Google Workspace, Microsoft Office Suite, Canva, Arduino
Lab Skills: Titration, Reactive-Ion Etching (RIE), Microfluidics, Scanning Transmission Electron Microscope (STEM), Spectroscopy (UV-Vis/IR), Optical Profilometry, Thin-Film Deposition (Spin Coating, PVD, PECVD), Photovoltaic Device Characterization, Organic synthesis, Lithography (Photolithography/E-beam), Nanoparticle Synthesis, Optical Component, Laser Operation
