Xiang (Jason) Li

lx080418@gmail.com | +1 949-677-8674 | 2400 Durant Ave, Berkeley, CA 94704

Education

University of California, Berkeley Aug. 2026 – Present
Intended Major: Analytics (CS + Math) *Berkeley, CA*

Northwood High School Aug. 2022 – June 2026
GPA: 4.0/4.0 SAT: 1560 *Irvine, CA*

- **Selected Coursework:** Multivariable Calculus, Linear Algebra, Probability and Risk Analysis, Number Theory, Data Structures and Algorithms.
- **Leadership:** President of Math Olympiad Club, founder of Math Behind Games Club, Chinese Language Ambassador, fisrt USAMO qualifier in school history.

Experience

Competitions March 2026

- USAMO qualifier (score: 7/42); American Invitational Mathematics Examination (AIME) Top 1% in the US (Score: 14/15); American Mathematics Competition (AMC12) Top 2% in the US (Score: 145.5/150).

Data Analyst Intern June 2026 – August 2026
Jiangsu Raysilicon Technologies *Jiangsu, China*

- Collected and analyzed data on encoder body production defects. Visualized data through python programming.
- Applied statitical analysis (chi-squared test for independence) to determine reasons of defects and proposed sulotion to increase product quality. Improved production good quality rate from 43% to 96%.

Artificial Intelligence Research Intern July 2024 – Sept. 2025
SoftCom Lab *Pomona, CA*

- Trained machine learning models to classify AI-generated images using recent research findings on image texture patch.

Founder & CEO April 2025 – June 2026
MAGICS 501(c)(3) nonprofit *Irvine, CA*

- Taught 1,500 kids through weekly classes and summer camps in partnership with local elementary schools.
- Led a 32-member team of high school students and university undergraduates; developed a game-based math curriculum (50 lessons + games)

Projects

AI Image Detector | *Python, PyTorch, NumPy, Matplotlib, Panda* June 2025 – Aug. 2025

- Created a deep learning model that classifies AI-generated images.
- Implemented a smash-and-reconstruction framework to exploit the inconsistent inter-pixel correlation of AI-generated images, then classified using a convolutional neural network.

Math Magics | *C#, Unity, Aseprite* Oct. 2023 – Feb. 2026

- Created educational video game that accelerates both the learning of youth and their interest in math by integrating core arithmetic principles into game mechanics; self-drawn graphics and animations with Aseprite.
- Reached 2,000+ plays; won first place award at Game Gala. Link to *Math Magics*.

Skills

Bilingual in English and Chinese: Native speaker of both languages; fluent in speaking, writing, and translation.

Proficient coding languages: Java, C++, Python, C#, Scratch.

Proficient using Latex: Wrote many research papers in Latex. (this CV is also coded in Latex)
