Aadi Shankar

Princeton, NJ 08540 | (609)-305-1183 | aadi.shankar@berkeley.edu | linkedin.com/in/aadi-shankar

EDUCATION

University of California, Berkeley | May 2028 **Cumulative GPA:** 3.7/4.00
B.S. Business, B.A. Neuroscience, Life Sciences Business Entrepreneurship (LSBE), Minor in Data Science **SAT:** 1540/1600
Relevant Coursework: Introduction to Economics, Foundations of Data Science, Computational Structures in Data Science, Introduction to Biotechnology, Economics of Healthcare Innovation, General Biology, Foundations of Business
Honors & Awards: LSBE (1/25), Leerink Investment Banking Case Competition Team Finalist (1/6), NSLS Berkeley Honor Society Inductee, Cum Laude (1/20), Alumni Award (1/105), US Squash Scholar-Athlete Award

PROFESSIONAL EXPERIENCE

Dunning Capital | Raleigh, NC January 2026
Investment Banking Winter Analyst
- Created 5+ comprehensive company pitch decks for private industrial, biotech, and technology companies
- Conducted industry and company research (market sizing, comps, and key value drivers) to support live deal teams

Sansara Group | New York, NY May 2025 – September 2025
Private Equity Summer Analyst
- Conducted in-depth diligence on 300+ ABA healthcare and autism services companies, identifying operational, clinical, and geographic synergies to assess strategic acquisition fit for portfolio expansion
- Designed and implemented a Python-based AI sourcing tool that automated company targeting, improving lead generation accuracy and improving productivity by 2x across the deal sourcing workflow
- Built comprehensive DCF models for acquisition targets with revenue projections for investment and pricing theses

The Jagust Lab at Lawrence Berkeley Laboratory | Berkeley, CA September 2025 - Present
Research Project Lead & Laboratory Intern
- Built statistical plots and analyzed 500+ subject PET imaging dataset from a $50M+ NIH/LBL study on PET imaging data, directly comparing tau PET tracers (Flortaucipir and MK-6240) and cognitive and blood biomarker results
- Developed 30+ R-based statistical visualizations and regression models to characterize noise patterns in early-stage tau deposition regions, revealing cognitive and blood biomarker inconsistencies in low Tau patient populations
- Presented abstract at the prestigious Human Amyloid Imaging (HAI) Conference and created poster board presentation

Siemens Healthineers | San Francisco, CA September 2025 – December 2025
Part-time Consultant
- Created a Python-based probabilistic modeling framework which analyzed 1,000+ oncology trials generating Probability of Success (PoS) analysis and benchmarks across indications to identify strategic areas of growth
- Presented 8 GTM strategy solutions to 5+ senior C-suite and VP level executives, including head of theranostics, oncology, and marketing at Siemens and Varian, supporting therapeutic development and partnership consideration

LEADERSHIP AND EXTRACURRICULAR

Phoenix Consulting Group | Berkeley, CA January 2025 – Present
Senior Analyst & Director of Accounts
- Managed alumni relations, coordinating a networking event with 40+ alumni connecting current and former members
- Planned and executed a 200+ attendee panel with industry leaders (Bain, Goldman Sachs, GI Partners PE, PathAI, iRhythm, Stanford Med) in collaboration with the UC Berkeley Haas School of Business

Vandrevala Foundation | Remote May 2025 – September 2025
Project Member & Intern
- Led, designed and built an AI-powered co-pilot using modified LLMs that trained and scored over 2,000 counselor responses, improving crisis messages for India's largest mental health chat line for a patient population of 200M+
