Felix Park

1950 Oxford St, Berkeley, CA 94704 | felixpark@berkeley.edu | (678) 858 – 5483

EDUCATION

University of California, Berkeley, College of Letters and Science — Expected May 2027
Bachelor of Arts, Economics — Cum. GPA 3.78/4.0
University of California, Santa Barbara, College of Engineering — September 2023 - June 2024
Bachelor of Science, Computer Science — GPA 3.76/4.0

PROFESSIONAL EXPERIENCE

National Museum of History *Intern* Seoul, ROK May 2021
- Supported summer exhibition preparation; conducted guided workshops for students.
- Developed digital outreach: wrote weekly blogs, created social media content, and expanded museum visibility.

MUTO Architecture Firm *Intern* Pangyo, ROK May 2022 – July 2022
- Conducted market and design research on furniture and interior retail spaces.
- Assisted in setup/refurbishment of DIOR and EXQUISITE GUCCI exhibitions in Seoul.
- Translated architectural blueprints and documents from European partners into Korean.

LEADERSHIP EXPERIENCE

Table Tennis Club – Korea International School *Team Leader* September 2021 – May 2023
- Organized training schedules, recruited new members, and coordinated intercollegiate competitions.

Korea Student Association (KSA) *Human Resources Team* UC Santa Barbara October 2023 – June 2024
- Managed membership database, dues collection, and internal communications.
- Co-organized social and cultural events with peer associations (e.g., Asian Karaoke Night, KSA x JSA Halloween).

PROJECTS

Mock Investment Portfolio – Finance Club, Korea International School August 2022 - May 2023
- Collaborated with club members to design and manage a simulated investment portfolio, analyzing market trends and asset allocation strategies.
- Applied quantitative analysis and financial modeling to track portfolio performance and evaluate risk-return trade-offs.
- Presented results through data visualizations and performance metrics, improving decision-making and investment strategy understanding.

CS research – UCSB | ***Advisor: Prof. Jonathan Balkind*** October 2023 - May 2025
- Conducted research in programming languages, computer architecture, and operating systems.
- Developed and analyzed software/hardware co-design projects, exploring performance optimization and system scalability.
- Gained experience in OS design, FPGA tools, and open-source hardware frameworks.

AWARDS

UGA Math Competition 2021 *4th Place*
- Competed as a school representative, solving high-level mathematical problems under timed conditions to advance to the semi-final round.

World Mathematics Team Championship(WMTC), Bulgaria 2022 *9th Place in Korea*
- Collaborated with peers to tackle high-pressure, multi-stage mathematical challenges.
- Participated as a high school representative, advancing into the qualifying rounds.

Architectural Foundation of San Francisco International Competition 2022 *1st Place*
- Led the design of a net-zero metro station, integrating architectural aesthetics with engineering feasibility and resource-efficiency.
- Delivered a polished strategic pitch complete with architectural schematics, waste-management proposals, and 3D renderings—mirroring consulting deliverables.

ADDITIONAL INFORMATION

- **TECHNICAL SKILLS:** Python, C++, Swift, Java, HTML; FPGA & OS development tools
- **LANGUAGES:** English(Fluent), Korean(Native)
- **INTERESTS:** Soccer, avid reader of classic and contemporary literature, and perpetual traveler
