EXPERIENCE

AI Engineer, Stanford University Graduate School of Education Sep 2023 — Aug 2024

- Explored the analysis of 5,000 qualitative data excerpts from Stanford undergraduate students using large language models (LLMs) at Pathways Lab to understand students' course experiences.

Founder and CEO, Socrates Inc. Sep 2021 — Sep 2022

- Conceived, edited, and published a four-volume self-study series that teaches world history and international affairs through a foresight framework; developed companion mental-models workshops for hands-on application
- Raised $9.1 K through crowdfunding to expand production and launch a reader community
- Built an engaged network via book clubs, online forums, and live seminars, using feedback to drive iterative content updates
- Executed a data-driven marketing strategy that increased unit sales by 334 percent
- Negotiated vendor contracts that reduced production costs by 30 percent while maintaining quality
