JAEWOO PARK

jayon1221@berkeley.edu

EDUCATION

University of California, Berkeley *Berkeley, CA*
B.A. Public Health & Economics · Minor: Education
Relevant Coursework: Biostatistics, Health Economics, Macroeconomics, Microeconomics

EXPERIENCE

Research Assistant *Feb – May 2026*
UC Berkeley *Berkeley, CA*

- Co-authored a research manuscript on designing effective chemistry-teacher training modules, synthesizing literature on Knowledge Integration, laboratory safety, and green chemistry.
- Presented a research poster analyzing survey responses from pre-service and credentialed chemistry teachers to inform the design of training modules covering laboratory safety and green chemistry.

Biolab Intern *Jun – Aug 2025*
Avellino Lab USA, Inc. *Menlo Park, CA*

- Designed, modeled, and 3D-printed custom hardware components for a Raman spectrometer, an analytical instrument utilized to perform molecular fingerprinting.
- Created an illustrated assembly and operating manual for a lower-cost Raman spectrometer, documenting component specifications and setup procedures.

Summer Camp Teacher *Jul – Aug 2024*
SF Korean Heritage & Cultural Youth Camp *Davis, CA*

- Led a weeklong cultural immersion program for high schoolers, overseeing a collaborative video project on Korean heritage and fostering inclusive group dynamics and student leadership.

Associate Teacher *Feb – May 2024*
Sweet Butterfly Daycare *Sunnyvale, CA*

- Designed age-appropriate activities supporting early cognitive, social, and emotional development in children ages 2–5; tracked milestones in collaboration with lead teachers.

Math Tutor *Jun 2023 – Present*
Self-Employed *Santa Clara, CA*

- Delivered individualized instruction in AP Calculus AB/BC, SAT/ACT/AIME prep, and competition math to 10+ students; designed custom problem sets improving test performance and confidence.

Head Go Teacher *Aug 2021 – May 2026*
Silicon Valley Korean School *Cupertino, CA*

- Designed a comprehensive Go curriculum from scratch, mentoring 100+ students and guiding several to competitive-level play; organized school-wide tournaments to reinforce strategic thinking.

PROJECTS

Poker AI
Python, PyTorch, Reinforcement Learning

- Developed a prototype heads-up cash-game poker agent using Deep Counterfactual Regret Minimization (Deep CFR) to learn strategies without hand-crafted game abstractions.
- Designed multilayer perceptron (MLP) models, with each agent's initial strategy set to a uniform action distribution.
- Integrated the models into a self-play training pipeline, enabling both agents to iteratively improve their strategies through simulated games.

EXTRACURRICULAR ACTIVITIES

Problem Writer & Staff *Sep 2024 – Present*
Berkeley Math Tournament *Berkeley, CA*

- Authored original competition problems for middle and high schoolers; proctored rounds and coordinated logistics for 300+ attendees.

Science Researcher *Oct – Nov 2023*
Harvard Science Research Conference *Cambridge, MA*

- Proposed a research thesis on leveraging Wolbachia bacteria as a viral inhibitor to limit mosquito-borne disease transmission; presented to Harvard-affiliated faculty reviewers.

SKILLS

Languages: English, Korean, Spanish
Technical: Python, R, Microsoft Office Suite, Google Workspace, basic laboratory instrumentation

AWARDS & HONORS

- AIME Qualifier 2023 & 2024 — AMC 12 Distinction (Top 5%); AIME Score 7 (Top 30%)
- President's Volunteer Service Award (Gold) — 300+ volunteer service hours · Sep 2023
- SF Go Tournament — Division 1 (Highest Rating Group) 1st Place · Apr 2023
