EDUCATION

University of California, Berkeley Expected Graduation May 2030
Bachelors of Arts in Applied Mathematics

Abraham Lincoln High School Aug 2021 - Jun 2025
W-GPA: 4.33 GPA: 3.92 *San Francisco*

EXPERIENCE

United States Marine Corps - Reserve Jul 2025 - Present
Lance Corporal (E-3) / Infantry Rifleman (MOS 0311), Team Leader *Pasadena, CA*

- Completed the Marine Corps School of Infantry while consistently upholding strict operational benchmarks and mastering rapid, high-stakes decision-making, effective communication, and advanced infantry tactics
- Developed exceptional operational and mental resilience through rigorous physical, mental, and stress-exposure training
- Command a 4-person fire team through high-stress live-fire tactical maneuvers, managing risk to execute 100% of mission objectives without any safety or strategic breaches
- Maintain operational readiness and asset tracking for $1M+ in military equipment, enforcing strict inventory controls across a 40-person unit through attention to detail

Ethos Life Insurance Agency Mar 2026 - Present
Insurance Producer *San Francisco, CA*

- Perform quantitative financial risk assessments for 10+ clients monthly, analyzing income streams and liability coverage to recommend appropriate life and health insurance policies through consultative sales

Project CodeLeap Aug 2024 - Jun 2025
Vice President *San Francisco, CA*

- Secured a $10,000 Youth Empowerment Fund (YEF) grant to deliver technology packages - laptops and peripherals - to low-income students across San Francisco
- Partnered with the San Francisco Main Public Library to design a 10-week Scratch coding curriculum and lead weekly workshops building digital literacy for K-5 students citywide

RESEARCH

Polygence Aug 2024 - Apr 2025
Data Science Researcher *San Francisco, CA*

- Analyzed sensor data architectures and machine learning threat classifications to evaluate threat detection performance across various systems spanning 60+ years
- Authored and published a peer-reviewed literature review on the applications of data science and machine learning in the radar, ultraviolet, infrared, and laser sensors in military aircraft threat detection systems: DOI: 10.58445/rars.2438
