Mahmood Yunus Naser

Software Developer |
Cybersecurity Graduate

SUMMARY

Recent Cybersecurity graduate skilled in Go, Python, SQL, Docker, backend APIs, authentication, databases, and containerized applications, with proven problem-solving, tutoring, and collaboration experience.

Projects

Role: Software Developer 06/2025 - 07/2025
Todo App Project

- Built a full-stack to-do application with CRUD functionality, task status tracking, filtering, validation, and persistent storage.
- Implemented responsive UI behavior for adding, editing, deleting, and managing tasks with clear user feedback.

Role: Software Developer 02/2025 - 06/2025
Social Network Project

- Developed backend logic for core user-facing features, including the home feed, overall feed functionality, and profile pages.
- Implemented the authentication backend logic, including login, registration, session-related handling, and user data flow.
- Fully Dockerized the application’s frontend and backend services, creating a containerized development setup while using SQLite as the project database.

EXPERIENCE

Internship Trainee (Cloud DevOps) 08/2023 - 09/2023
VirtuThinko

- Used AWS CloudFormation to set up infrastructure (compute, networking, storage) through IaC instead of manual setup, thus reducing deployment time.
- Enhanced security by embedding and enforcing IAM roles/policies and VPC configurations into the deployment templates.

EDUCATION

Full-Stack Development 03/2024 - 07/2026
Reboot Coding Institute - Diploma

Cybersecurity (GPA 3.65) 09/2022 - 06/2026
Bahrain Polytechnic - Bachelor's Degree

SKILLS

- SQL
- Git
- GraphQL APIs
- REST APIs
- Linux/Unix
- Docker
- Next.js
- JavaScript | TypeScript
- Go
- Python
