MARIAM ABBAS ALI

FULL STACK SOFTWARE DEVELOPER

EDUCATION

• B.Sc. in computer engineering

University Of Bahrain

Sept 2022 - Present

Building a strong technical background in hardware and software systems, with a focus on problem-solving, critical thinking, and innovation in the tech field.

Reboot Coding Institute

2023 - 2026

Gaining hard and soft skills through Reboot's gamified learning experience, helping me build a strong foundation as a fast learner and adaptable problem solver, with a focus on mobile application development and creating user-friendly, functional apps.

• Full Stack Development and Mobile Application Diploma

CERTIFICATES

- Ethics of Artificial Intelligence from Politecnico di Milano.
- HCIA-Cloud Computing V5.0 – Huawei.

LANGUAGES

English

Arabic

PROFILE

Motivated and responsible Computer Engineering student at the University of Bahrain, currently an aspiring developer at Reboot Coding Institute. Passionate about technology and problem-solving, I continuously seek to learn and grow in the evolving IT field. I actively pursue opportunities to apply my skills and gain real-world experience, striving to prove myself as a valuable asset to any team. Moreover, I am eager to connect with like-minded individuals and professionals in the tech community. My goal is to contribute to innovative projects that make a meaningful impact while continuously evolving as a developer.

WORK EXPERIENCE & INTERSHIP

Freelancer – Design & Admin Support

(Self-employed / Private Projects) 2020 – Present

Delivered freelance services in graphic design, document creation, and administrative support. Developed strong communication, time management, and adaptability skills across diverse client needs.

Full Stack Developer Trainee

Reboot Coding Institute June 2025 - Sept 2025

Worked on developing a website from scratch, gaining hands-on experience in front-end and back-end development, database design, and system integration. Built user-friendly interfaces and utilized Figma for UI/UX design and prototyping.

Graphic Designer

Last Pro Media 2024

Designed digital visual content including social media posts, banners, and promotional materials, maintaining clean and modern brand-aligned designs.

Secretary Management

Alhamra Workshop 2024

Managed administrative tasks, scheduling, documentation, and daily operations to support efficient workflow and communication.

VOLUNTEERING

TRYBE Dec 2024 – June 2025

- Assisted in backend and database development for web and mobile apps
- Supported front-end design and user interface improvements
- Contributed to deploying the official platform for a Bahrain startup: https://trybe.bh

MARIAM ABBAS ALI

FULL STACK SOFTWARE DEVELOPER

PROJECTS

4-Stage Pipelined Processor | Apr 2025 – May 2025 | Personal Project

A 4-stage pipelined processor (IF → ID → EX → WB) designed in VHDL with correct data path and control logic, compiled and verified in ModelSim with RTL waveform outputs validating pipeline correctness and hazard handling.

GitHub Repository: 4-Stage Pipelined Processor

Mazewar | Mar 2025 – May 2025 | Reboot Coding institute

A multiplayer FPS-style game inspired by the classic Maze War, built in Rust, featuring a modern client–server architecture with real-time rendering and low-latency UDP communication.

GitHub Repository: mazewar

Sky Map | Dec 2025 | Reboot Coding Institute

A mobile sky map app built in React Native that uses the device's GPS, accelerometer, and magnetometer to render planets, the sun, the moon, and constellations on a real-time canvas, with tap-to-view descriptions .

GitHub Repository: Sky Map

Library Management System | Nov 2024 | Personal Project

A web-based library management system built with PHP and MySQL, enabling users to add, update, delete, borrow, and return books, as well as view book details and genres. The system is served via Apache using XAMPP and connects to a structured MySQL database, demonstrating full-stack web development with a focus on CRUD operations and database management.

GitHub Repository: Library Management System

Stock Market | Feb 2025 | Reboot Coding Institute

A real-time stock market simulation app built in React Native, where users start with $1,000,000 in simulated funds to buy, sell, and hold 20 monitored stocks. Features include login/signup authentication, a live portfolio wallet, historical price charts, and real-time data updates at least five times per second.

GitHub Repository: Stock Market

SKILLS

- **Hard Skills**

Web & Front-end Development

- HTML5, CSS3, ES6, JavaScript, TypeScript – modern, responsive web apps
- Front-end frameworks: Next.js, Vue.js, Angular.js, React.js, React Native
- Tailwind CSS – utility-first styling for rapid UI development
- Figma – UI/UX design and prototyping

Back-end & Databases

- Python & Django – REST APIs and web development
- Go (GoLang) – backend services
- PHP & Laravel, Ruby on Rails – full-stack and CMS solutions
- SQL & SQLite – database design, queries, optimization
- NoSQL (MongoDB, DynamoDB) – flexible data models and cloud storage
- GraphQL & API testing with Postman

Programming & System Languages

- C, C++, C#, Java, Rust, Assembly, VHDL – system-level and application programming
- Shell/Bash scripting – automation and environment management
- Linux, Windows, WSL – system administration and dev environments

Cloud, DevOps & Deployment

- AWS: EC2, S3, RDS, Lambda, API Gateway, Cognito, CloudWatch, Bedrock
- Docker & containerization – environment isolation and deployment
- CI/CD & GitHub workflows – version control and collaborative development

AI & Automation (Familiarity)

- Completed university coursework in Machine Learning
- Familiar with AI tools, agents, and basic AI workflows
- Introductory experience with AI reasoning and automation

Software Architecture & Best Practices

- Modular and scalable software architecture design
- Auditing, compliance, and clean code practices
- Testing, documentation, and good development practices

- **Soft Skills**
  - Curious and adaptive to new technologies
  - Strong problem-solving skills and attention to detail
  - Good grasp of data structures, algorithms, and calculations
  - Team player with leadership potential and collaborative mindset
  - Able to adapt to workflows, project requirements, and evolving tools

ACHIEVEMENTS

- Won the "Best Use of Technology" award in the NASA Space Apps Challenge 2023.
- passed the ESP exam with a score of 99%.
- completed INJAZ Bahrain : Company-Uni program.
