EDUCATION

University of California, Berkeley **Class of 2028**

BA in Molecular and Cell Biology (Molecular Therapeutics) and Economics

- **Relevant Coursework:** Data and Decisions, Sustainable Capitalism, Biotechnology, Integrative Human Biology
- **Clubs and Activities:** Bio-Business Initiative, Business Review at Berkeley, Undergraduate Economics Association (Research and Consulting Committees), Data Science Scholars Program, Goldman Sachs Possibilities Summit

WORK EXPERIENCE

Xelay Acumen **San Mateo, CA**

Healthcare Consulting Intern **May 2025 - August 2025**

Strategy consulting for healthcare clients focused on enabling distinctive success for innovative products that matter.

- Developed hypotheses on patient outcome drivers and validated them through analysis of ~3,000 patient records across subgroups (age, BMI, lab values), generating insights that guided strategy for 4 drugs across 2 clients.
- Developed the narrative for a new oncology drug by building a deck that synthesized competitor benchmarks, efficacy data, safety outcomes, and quality-of-life insights into a cohesive story.
- Contributed to 3 scientific manuscripts (2 full drafts), with 1 accepted to a national medical congress; created the associated poster and speaker script.

Melio **Sunnyvale, CA**

Assay Development Scientist **June 2023 - August 2024**

Medical technology company developing a rapid pathogen testing device to deliver results in 3 hours versus 3 days, reducing over-administration of antibiotics in the NICU through advanced microfluidics and machine learning techniques.

- Designed and executed weekly DNA melt experiments and primer screenings, analyzing melt curve data and presenting findings in team meetings to improve accuracy of the AI-driven pathogen recognition model.
- Synthesized insights from 20+ publications into investor presentations demonstrating clinical need, competitive advantages, and risks of antibiotic overuse.

LEADERSHIP

Flying Samaritans: Berkeley Satellite **Berkeley, CA**

Co-founder **November 2024 - Present**

Student-led branch of the Flying Samaritans non-profit providing medical care to underserved communities in Mexico through monthly service trips while offering clinical experience and professional development opportunities for volunteers.

- Built key partnerships with CSULB and UCSD chapters to gain access to established clinic sites and communities in Mexico, attended weekly meetings with their leadership to kickstart club and network.
- Collaborated with Flying Samaritans non-profit leadership to establish infrastructure including a constitution, leadership positions, club identity, and an organized documentation system to support long-term chapter growth.
- Recruited and oversaw a 12-member board to scale outreach efforts and lead recruitment of volunteers.

RESEARCH EXPERIENCE

Piao Lab | UCSF Weill Institute for Neurosciences **San Francisco, CA**

Research Assistant **January 2025 - Present**

Research lab investigating glial cell contributions to Alzheimer's disease pathology through single-nucleus RNA sequencing.

- Performed mouse genotyping via PCR to characterize genetic variations and select experimental models.
- Executed brain sectioning cryostat, staining, and quantitative cell counting to investigate glial cell pathology.
- Presented findings and recent publications in weekly roundtable discussions on neurodegeneration.

Review Paper: Exploring the Complexities of Aging **Published October 23, 2023**

- Authored a 22-page paper examining 4 genetic and environmental factors affecting biological aging, including telomere length and the FOXO3 transcription factor, published in Curieux Academic Journal.
- Analyzed scientific literature, reviewing and compiling data from over 50 articles, to draw connections between various factors and provide insights for future studies.

Skills: Excel, PowerPoint, Python (Data Analysis), Clarinet, Tenor Saxophone
