MELIH CIN

424 270 5575 - 1950 Oxford St, Berkeley CA - melih@berkeley.edu

Motivated and self-reliant student of Applied Mathematics at UC Berkeley with a strong background in in engineering complete analytics stacks, developing predictive models, and driving operational efficiency. As a political asylum seeker living independently in the United States, I've developed exceptional resilience, adaptability, and a deep sense of initiative — qualities that drive my academic and professional growth.

EXPERIENCES

Business / Operations Data Analyst **June 2025 - Aug 2025**
The Colony

Engineered and executed the analytics stack for The Colony (30+ brand ghost kitchen, mixed fulfillment model). Utilized Python (Pandas) and advanced SQL to integrate fragmented POS, delivery, and logistics data. Developed predictive models for kitchen throttling and created dynamic dashboards tracking queue management, fulfillment mode efficiency, and order abandonment, resulting in a 12% increase in rush-hour throughput.

Data Analyst Intern **Sep 2024 - Jan 2025**
Anre AI

Performed deep project analysis, cleaned, and engineered datasets for machine learning model training using SQL and Python (Pandas/Scikit-learn). Built high-impact Tableau dashboards to visualize model performance, identify feature friction points, and drive key optimization improvements for UC Berkeley AI research initiatives.

Mathematics Tutor **Jan 2024 - June 2025**
Santa Monica College

Tutored students weekly in Precalculus through Multivariable Calculus, offering personalized support in both one-on-one and group settings.

EDUCATION

Univ of California Berkeley 2025-Current
Applied Mathematics, minoring in Data Science

Santa Monica College 2023-2025
Applied Mathematics
