School of Economics and Management, Beijing University of Technology

EDUCATION

University of California, Berkeley Aug 2025 – May 2026

Visiting Student, Berkeley Global Access Program(Planned)

Intended Coursework: Data Science, Probability, Political Research, Business Strategy, Engineering Simulation, Biotech, Innovation & Startups (Challenge Lab focus)

Beijing University of Technology Sep 2023 – Jun 2027

B.A. in Big Data Management and Application GPA: 3.67 / 4.00

Relevant Courses: Python, Database Tech, Data Structures, R, Statistics, OOP, etc.

INTERNSHIP EXPERIENCE

Software Engineering Intern, InsightWave Tech (Industry Collaboration) Oct 2024 – Jan 2025

- Built cross-platform enterprise tools: "CollabCloud" for team scheduling, and "DataCloud" for internal data analysis.
- Developed core features using Flutter in Cursor; optimized UI/UX and collaborated via GitHub PRs.

Software Development Intern, GradPath Navigator (EdTech Startup) Jun 2024 – Aug 2024

- Developed a WeChat Mini Program for postgraduate test prep at an early-stage education startup, building UI with JavaScript and WXML and integrating LLM APIs for personalized learning.
- The product won Third Prize at the iCAN Beijing Innovation Competition and was later commercialized as Beijing Tuomengzhe EduTech Co., Ltd.

RESEARCH EXPERIENCE

Research Contributor, Patent Classification using RAG (NLP Project) Oct 2024 – Jun 2025

- Joined a Data Mining group led by a PhD supervisor in the Department of Management Science and Engineering.
- Conducted independent study on patent IPC classification using fine-tuned RAG models, focusing on retrieval, recommendation, and multimodal learning. Draft paper submitted to a peer-reviewed journal (co-authored).

Student Researcher, Cross-Platform Social Media Opinion Forecasting (University Spark Project) Feb 2024 – Dec 2024

- Conducted BERT-based topic classification and trend forecasting on cross-platform data (e.g., Sina Weibo, Zhihu) under a student-led AI initiative; deployed models on Linux servers.
- Project received Excellent Research Award and was submitted for national patent.

COMPETITIONS & INNOVATION PROJECTS

Data Analyst, National Undergraduate Market Research Competition Oct 2024 – Mar 2025

- Won First Prize in a Beijing research competition focused on Gen Z loyalty to domestic skincare brands.
- Led the literature review and performed consumer segmentation using SEM and K-means clustering in SPSS.

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML, SPSS

Frameworks & Tools: Flutter, GitHub, Linux (model deployment)

Technical Focus Areas: NLP, LLMs (BERT, RAG), Recommender Systems
