EDUCATION

UC Berkeley CDSS - Class of 2029

SKILLS

- Proficient in R, Python, Java and SQL
- Familiarity with tuning regression models and working with AI and machine learning tools
- Experience building Shiny apps and creating data visualizations

EMPLOYMENT

- Lead Data Analyst for James Logan Basketball 2023-2025
  - Designed excel spreadsheet that takes real-time events and calculates various team statistics
  - Attended every game, inputting data into spreadsheet to drive in-game adjustments
  - Worked closely with coaches, including postgame emails and continuous in-game reports
- Cal Football Data Engineer (Contract) 2026
  - Designed a dashboard for Cal Football to collect and summarize rehab data efficiently
  - Worked with data from NordBord, Catapult, and DataVis, as well as local spreadsheet data
- Cal Basketball Data Engineer (Contract) 2026 - current
  - Designing a dashboard to optimize transfer portal signings for Cal Basketball
  - Using modeling techniques to identify players most likely to make it to the NBA
- Member of Sports Analytics Group at Berkeley
  - VP of Professional Development 2026
    - Tasked with preparing new members to work with companies on consulting projects
    - Organizer of club's annual Sports Analytics Conference

PROJECTS

- Participated in NFL Big Data Bowl 2024, 2026
  - Used frame-by-frame tracking data to design and carry out an original statistical analysis project
  - Created unique and interesting visualizations to convey statistical concepts to a non-technical audience
  - Wrote and edited paper explaining process and findings
  - Link to 2026 Submission
- Participated in SMT Data Challenge 2026
  - Project currently under embargo
  - Organized a well-rounded team and took the lead in delegating responsibilities and setting deadlines
  - Used R and Python for data cleaning and analysis
- Built STEPH Shiny app and model for predicting NBA playoff winners
  - Scraped data from the internet to feed into app
  - Trained logistic regression model to predict playoff winners
  - Built easy-to-use Shiny UI allowing user to compare two teams and see all-time leaderboards
