510-460-0107 | arnavbhatnagar@berkeley.edu | linkedin.com/in/arnavbtngr | Berkeley, CA

EDUCATION

University of California, Berkeley Expected 2029
B.A. Statistics
Fung Fellowship, Incoming Fellow in Sustainability and Innovation, Fall 2026 cohort
Coursework 2026-27: Stat 134, CS 61A, Data 100, Econ 141, Stat 155

Foothill College Sep 2025 – Jun 2026
A.S. Data Analytics, Business | GPA: 4.0
Dean's List, 3 terms | Honors Scholar
Coursework: Intro to Data Analytics for Business Decisions, Honors Principles of Business, Intro to Data Science, Machine Learning, Linear Algebra, Discrete Mathematics, Deep Learning, Calculus, C++ Series, Computer Architecture

SKILLS & TOOLS

Financial & Data Analysis: Excel / Google Sheets (pivot tables, lookups, charting, data cleanup), SQL, Python (pandas, scikit-learn), statistical modeling
Reporting & Automation: Automated reporting workflows, data model design, dashboard accuracy audits, data validation, process standardization
Communication: Executive-style writing, stakeholder presentations, cross-functional documentation, translating complex findings for non-technical audiences
Interests: Cooking, hiking, traveling, pottery, taekwondo, swimming, music

EXPERIENCE

Data Governance & Climate Data Intern, Horizon17 2025
- Analyzed limitations of multi-scenario simulation models and identified underlying assumptions producing errors, improving forecast projection accuracy by 15%.
- Assisted in building automated data pipelines processing 100GB+ of structured data, embedding data quality checks that made downstream reporting reliable.
- Partnered cross-functionally with engineers and scientists to standardize definitions and reporting structures across teams.

Student Representative, Data & Operations, World Food Movement 2024 – Present
- Audited meal-distribution dashboards for accuracy and data integrity across 4 campuses, where forecast error directly drove over- or under-supply of 7,500+ meals.
- Served across 4 functions (technical, operations, governance, and CRM), supporting 125+ platform users and resolving 50+ account issues in a fast-moving environment.
- Drafted operating policies standardizing workflows across 3 teams, reducing duplicated effort and formalizing interdepartmental reporting protocols.
- Presented the organization's mission to an audience of 100+; contributed 110+ hours and personally delivered or served 2,500+ meals, roughly one-third of total impact.

Data Science Writer, Medium 2022 – Present
- Authored an 18-week series on statistics, machine learning, and climate modeling, earning 80,000+ impressions across publications with 370K+ combined followers.
- Created original analyses and data visualizations interpreting quantitative results for readers with no statistics background.

Student Researcher, Aspiring Scholars Directed Research Program 2023
- Led a team analyzing 10,000+ data points to build a city-level COVID-19 hotspot risk model (75%+ accuracy); designed an end-to-end pipeline with validation methods, then presented findings to students and faculty.

LEADERSHIP & ACTIVITIES

Learning Director, Data Science & AI Club 2025 – 2026
- Led 75% of meetings for 20+ members; taught Python and ML fundamentals through applied healthcare and climate projects.

STEM Instructor, CompuChild 2025 – Present
- Teach financial literacy and STEM data concepts to 10+ K-8 students; build original materials for a non-expert audience.

Historian, Consulting Club 2025 – 2026
- Unanimously elected; organized national case competitions and pro-bono consulting events.

Varsity Debater, Speech & Debate 2022 – 2025
- Competed in 16 regional and national tournaments (Congressional Debate & Extemporaneous Speech); Varsity distinction.

HONORS & CERTIFICATIONS

Semi-Finalist, Google Case Competition | 5th Place / Excellent Speaker, GGSA Debate | Distinguished Honors Scholar | High School Diploma, June 2025 (10 AP, 2 Honors) | Python for Web Data + Data Visualization Capstone, University of Michigan
