Education

University of California Berkeley **Expected Graduation: May 2029**
B.A. Applied Math and Data Science
Courses Taken: Structure and Interpretation of Computer Programs, Foundations of Data Science, Data Visualization, Foundations of Computer Programming

Technical Skills

Programming Languages:	Python, Java, JavaScript, HTML5/CSS
Machine Learning:	TensorFlow, PyTorch
Frameworks:	NumPy, Pandas, Matplotlib, Seaborn, OpenCV
Developer Tools:	Git, Jupyter Notebooks, Jira, Excel

Work Experience

Machine Learning Research Assistant **Aug. 2024 - Nov. 2024**
Indiana University, Bloomington *San Jose, CA*

- Supported LLM research in the medical domain under Professor Da Yan and Ph.D. student Saugat Adhikari by annotating several hundred data samples for training and evaluation tasks.
- Assisted with simple PyTorch model training workflows, including dataset loading and basic model evaluation for NLP-related tasks.

Machine Learning Research Assistant **May. 2024 - Jul. 2024**
University of Texas, San Antonio *San Jose, CA*

- Conducted research under the CAREAI cohort with Professor Ke Yang and Ph.D. Jason Johnson, focusing on counterfactual generation to improve classifier fairness and enhance model interpretability.
- Collaborated on implementing and testing Python-based ML models, analyzing the fairness impact across multiple datasets using a range of standard fairness metrics.

Projects

Fitness Tracker with AI Pose Estimation

- Built an AI-powered fitness tracker using MediaPipe, OpenCV, and convolutional neural networks (CNNs) to analyze joint angles.
- Achieved 95% accuracy in detecting proper exercise form through pose estimation and real-time analysis.
- Used NumPy for fast data processing and automated repetition counting to deliver instant performance feedback.

Leadership

Founder **May. 2023 - May. 2025**
HowToHackathon

- Founded and led 25+ global hackathons and olympiads with 25,000+ participants and $2.5M+ in awarded prizes, fostering large-scale technical innovation and collaboration.
- Built partnerships with 10+ industry leaders (Wolfram, Postman, Desmos) and connected 100+ judges from companies like Meta, Google, and Nvidia.
- Managed technical operations, sponsorships, event logistics, and a 20+ person team; ran a 1,000+ subscriber tech newsletter with 75%+ engagement.

President **Dec. 2022 - May. 2025**
DevFinTech

- Co-founded and led an organization that established 100+ global chapters, expanding access to FinTech and computing education.
- Educated 5,000+ students through hands-on FinTech courses, blending finance and computing.
- Spearheaded events and competitions in stock market simulations, cryptocurrency trading, and coding challenges to foster real-world financial skills.

Awards

AP Scholar | Academic D Block | PVSA Gold | Hackathon Winner (1st) | CIF President's List
