KEVIN Z WONG

2050 Durant Ave, Berkeley ◇ 408-840-1978 ◇ linkedin.com/in/kevinzwong

EDUCATION

University of California, Berkeley Expected June 2028
B.S. **Industrial Engineering & Operations Research**
GPA: 3.4/4.0 — **Relevant Coursework:** CS 61B, EECS 16A, INDENG 142A, 160, 120

EXPERIENCE

CentralComs – Founder & Technical Lead July 2025 - Present

- AI platform that automates 80%+ of routine maintenance coordination for property managers
- Engineered Agentic Ticket creation and Vendor dispatch system, sub-5 minute end-to-end automation

XChange – Technical Co-Founder May 2025 - July 2025

- AI Short form content generator + Advertising campaign manager for extreme targeted advertising, 50+ campaigns
- Secured $XX,XXX annual contract with credit consulting firm
- Built video personalization pipeline: voice cloning, dynamic script generation, auto-lip syncing, smart B-roll generation
- Achieved 7x improvement in advertising engagement metrics through personalized content delivery

Vly.ai – Engineering Intern — YCombinator F24 December 2024 - May 2025

- Developed automated testing and code generation systems for enterprise SaaS platform serving 4000+ clients
- Delivered full-stack product for GrowthFactor.ai from concept to production deployment in 3-weeks
- Implemented end-to-end Full Stack Developement workflows using LangChain, Vercel, and Convex

Stanford University – Entrepreneurship Program TA August 2025

- Teaching assistant for AAASE international entrepreneurship program (50 students globally)
- Mentored winning team (3rd place) developing CircuitCycle, an AI-powered e-waste classification system
- Instructed workshops on customer discovery, MVP development, and product iteration methodologies

TECHNICAL PROJECTS

AI Video Production Pipeline (VMAC) August 2023 - September 2024

- **ConGen**: Built concurrent GPU orchestration system for parallel Diffusion Based Image Generation Models across multiple GPUs with dynamic task queuing and automatic VRAM management, achieving 60% generation time reduction (30s → 12s per image)
- **Mapling**: Developed custom animation engine using cubic B-spline interpolation for cinematic Ken Burns effects. Developed lossless smooth curve animation storage system
- **LLM Finetuning**: Finetuned multiple LLaMA 3.1 70B-4bit on 4k scrapped + synthetic samples (10 epochs, batch size 4) achieving 10x loss reduction on $2k custom infrastructure (dual RTX 3090 24GB, Threadripper 1920X), utilizing QLoRA 4-bit quantization saving 75% VRAM
- **Finetune Models (Huggingface)**: Script Gen, Image Desc, Titles

LEADERSHIP & ACHIEVEMENTS

Athletics: Cal Fencing Captain · 3x Junior Olympic Qualifier · National Senior Team Top 32 · Epee Cadet Champion
Entrepreneurship: Top 5% YC Founder Match · Stanford AAASE Program · TreeHacks & LA Hacks Participant
