Ryan Gary Li

Berkeley, CA | (510) 960-9350 | rgl@berkeley.edu

EDUCATION

University of California, Berkeley — Berkeley, CA

B.A. in Physics, College of Letters & Science — *Expected May 2030*

Chinese International School, Hong Kong — Hong Kong

International Baccalaureate Diploma Programme — *Graduated 2026*

HL: Physics, Math AA, Economics | SL: Computer Science, English Language & Literature, Chinese B

Score: 44/45

Honors: 1st Place (Top 1/300), Hong Kong Youth Science & Technology Innovation Competition; Winner (Top 1%), Forbes China Youth Artists 100; CIS Physics Subject Award; Head's Commendation for 90%+ academic average (Grades 9–11)

EXPERIENCE & LEADERSHIP

XtalPi (AI-driven drug discovery & computational chemistry) — Shenzhen, CN

AI Chemistry Intern — *Jun 2026 – Jul 2026*

- Built an automated high-throughput quantum mechanics (QM) pipeline in Python (Gaussian 16, Slurm/HPC) to generate a molecular descriptor database spanning 1,000+ compounds for downstream drug-discovery ML models.
- Used RDKit to extract ~18 quantum-chemical descriptors per molecule (orbital energies, dipole moments, ionization potentials) from Gaussian output logs, structuring results into a JSON/CSV database.
- Managed multi-stage data flow across AWS S3 and an HPC cluster; diagnosed environment-configuration and data-integrity bugs to keep large-batch job runs reliable and reproducible.

BeatBot Innovation Technology Co., Ltd. (consumer robotics) — Suzhou, CN

Engineering Department Intern — *Jun 2025 – Jul 2025*

- Mathematically modeled a string-and-spring biomimetic turtle-neck mechanism, now implemented in a production robot.
- Worked with servo systems to refine and validate robotic motion.

Diamond Challenge — Hong Kong

AI Product Strategy Lead — *Jan 2024 – Apr 2024*

- Developed a business model for an AI-enabled smart refrigerator using computer-vision cameras to track food inventory, monitor expiration dates, reduce waste, and automate grocery reordering.

OKX Hong Kong (digital asset exchange) — Hong Kong

Business Development Intern — *Summer 2022*

- Researched cryptocurrency markets and translated bilingual research materials.
- Proposed automation ideas for data collection and AML compliance improvements.

Biomimetic Stingray Robot Project — Hong Kong

Researcher & Engineer — *Feb 2024 – 2025*

- Designed a low-cost, PLA/bamboo undulating-fin robot to make marine-conservation devices more accessible; won 1st place (top 1/300) at the HK Youth Science & Technology Innovation Competition following a written report, engineering submission, and oral defense before five judges.

CIS VEX IQ Robotics Club — Hong Kong

Founding President — *2024 – 2026*

- Founded and led a 20+ member robotics club; organized workshops on design thinking, robot construction, and coding, and hosted an inter-school tournament for 35 students across 8 teams.

CIS Entrepreneurship Club — Hong Kong

Vice President — *2023 – 2025*

- Curated entrepreneurship and design-thinking workshops and mentored student venture teams, guiding one team to the U.S. finals of the Diamond Challenge.

SKILLS, ACTIVITIES & INTERESTS

Technical Skills: Java, Python, C/C++, CAD, Blender

Languages: Fluent in English and Mandarin Chinese

Certifications: PADI Open Water Diver; PADI Advanced Open Water Diver

Activities & Interests: Varsity basketball & volleyball; scuba diving; biomimetic robotics and marine conservation
