Education

University of California, Berkeley May 2028
Bachelor of Arts in Economics & Data Science GPA: 3.8/4.0
Relevant Coursework: Financial Accounting, Microeconomics, Macroeconomics, Probability & Statistics, Foundations of Data Science, Structure & Interpretation of Computer Programs (CS 61A), Data Structures (CS 61B), Leadership Communications

Professional Experience

Roku New York, NY
Data Science Intern Jul 2026 – Sep 2026
- Built and deployed 2 internal AI tools for the audience insights team, consolidating 7 audience data sources into one queryable table and cutting a 5-hour manual research workflow to roughly 15 minutes per request.
- Turned viewership and audience data into recommendations product and business partners used to set quarterly priorities, presenting findings to stakeholders across the analytics, product, and sales organizations.

Business & Software at Berkeley (BSB) Berkeley, CA
Member Aug 2025 – May 2026
- Ran a 50-member organization with a 2% acceptance rate, stewarding a $30k+ asset base, competitive recruiting cycles, and client development for consulting engagements with Fortune 500 partners across several industries.
- Took client engagements from first pitch through delivery, managing timelines, relationships, and cross-functional teams of 5–8 to ship production-ready software and strategy work on a semester-long build, review, and client handoff cycle.

Google Remote
Contract Consultant Aug 2025 – May 2026
- Partnered with a 12-member consulting team to distill 40+ pages of market research into a 4-stage go-to-market framework for agentic AI on Google Cloud, defining 6 lifecycle KPIs across activation, credit utilization, and churn.
- Analyzed customer onboarding and GCP usage data to locate where new accounts stalled, using infrastructure metrics (IAM setup, API enablement, billing configuration) to redesign the path from signup to first paid usage.

FARO San Jose, CA
Management Intern Jun 2025 – Aug 2025
- Surveyed 150+ customers and benchmarked 7+ competing products, delivering the positioning and competitive analysis projected to grow market penetration 20% across 3 target retail markets and product categories.
- Produced 6 weekly performance reports synthesizing sales data, customer feedback, and unit economics, directly shaping 2 upcoming product launches and entry into 3 new retail markets over two fiscal quarters.

Peacock Remote
Analyst Aug 2025 – Dec 2025
- Ran 617 surveys and 36 customer interviews to locate where viewers dropped off, turning the raw signal into prioritized product requirements that shaped the content discovery roadmap for a major US streaming service.
- Designed and prototyped the Content Hubs and Peacock Flock concepts in Figma, iterating with design, engineering, and product partners through repeated rounds of customer testing, iteration, and internal design review before handoff.

Projects & Outside Experience

Berkeley URAP Berkeley, CA
Undergraduate Research Apprentice Sep 2024 – May 2025
- Built and tested a multiple-regression model in Python/SQL with 6 independent variables, revealing a statistically significant relationship between moral code and moral evaluation ($p < 0.001$) that anchored the study's findings.
- Executed a behavioral economics experiment with 231 undergraduate participants (92% completion), designing the survey instruments and study protocol under Haas Professor Clayton Critcher for peer-reviewed faculty research.

DECA California California
California State Vice-President Mar 2023 – May 2024
- Built and ran a 2-month statewide election campaign earning 4,200+ votes (75% majority) and the highest voter turnout in 5 years, owning outreach, messaging, and events across California chapters and local regions.
- Directed training for 5,000+ California DECA members through 10+ workshops and 20+ business case competitions, and pitched before 25,000+ delegates from 50 states and 10+ countries at international leadership summits.

Salesforce Remote
Student Project Assistant Jun 2023 – Jun 2025
- Ran 50+ personalized onboarding sessions for 200+ nonprofits adopting the "Power of Us" program, walking founders and small teams through account setup, data migration, and best practices to shorten time-to-value.
- Cold-emailed 3,000+ nonprofit executives across 10+ U.S. states, driving a 22% lift in site traffic and 350+ new organizations onto the platform through a structured, data-tracked outreach and follow-up pipeline.
