

Husam AlSabbah

AI Engineer | Agentic Systems & Enterprise GenAI | Azure-Certified AI Professional
Bahraini | +973 36043400 | husam.alsabbah@gmail.com | LinkedIn | GitHub

Profile

AI Engineer at KPMG specializing in production LLM systems: RAG pipelines, agentic workflows, and full-stack GenAI apps across cloud and model providers. Led end-to-end development of client-facing AI platforms across Legal, Tax, Finance, Procurement, HR, and ESG domains, from architecture and system design through deployment and evaluation. Azure-certified (AZ-900, AI-901) with a track record of delivering reliable, high-impact systems under tight timelines.

Skills

- **GenAI & LLM:** Large language models, RAG, vector databases, embeddings, semantic search, prompt engineering, agentic systems, LLM eval; providers including Azure OpenAI, OpenAI, Anthropic, Google Gemini.
- **Programming Languages:** Python, Java, TypeScript, SQL, JavaScript, HTML, CSS
- **Frameworks/Tools:** FastAPI, React, PyTorch, Keras, Angular, NodeJS, NestJS, Express, Git
- **Database Systems:** MySQL, MongoDB, NoSQL, Azure Cosmos DB, vector stores
- **Cloud & MLOps:** Azure, AWS, Docker, CI/CD, REST APIs
- **Core Competencies:** LLM System Design, AI Model Deployment, Machine Learning, Data Analytics, Full-stack Development, IoT Integration
- **Soft Skills:** Leadership, Team Collaboration, Problem Solving, Adaptability, Attention to Detail
- **Languages:** English (Bilingual), Arabic (Bilingual)

Experience

AI Engineer | KPMG Fakhro | Manama, Bahrain **Sep 2025 - Present**

- Led end-to-end development of client-facing GenAI platforms across legal, tax, finance, procurement, HR, and ESG domains, owning architecture, delivery, and deployment as the primary engineer.
- Earned repeat client engagement across several initiatives and a by-name request to lead follow-on work, after presenting AI solutions to Partner, Director, and client stakeholders.
- Built LLM systems combining rules-based detection, RAG over vector search, and knowledge graphs to automate contract analysis, corporate tax workflows, and tender evaluation, several delivered as technical lead.
- Developed backend services and APIs in FastAPI and Node/NestJS, with React frontends and microservices that streamlined and automated ~90% of multi-week manual processes into near-instant workflows.

AI Engineer Intern | e& | Abu Dhabi, UAE **May 2025 - August 2025**

- Delivered an AI-powered validation engine that cut manual ESG checklist review time by 85%, applying NLP to assess answer quality across 60+ audits.
- Led design and development of Python-based automation tools for enterprise data handling, NLP, and audit logic.
- Developed FastAPI backend and React frontend with Dockerized deployment.
- Converted business requirements into scalable AI workflows and documentation for audit automation.

Full-Stack Developer | EcoBarq Team (Shell Eco-Marathon) | Al Ain, UAE **June 2024 - Feb 2025**

- Led programming and web development for UAEU's EcoBarq sustainability team.
- Optimized site performance and navigation, increasing web traffic by 70%.
- Integrated real-time project updates, improving external visibility and stakeholder engagement.

President | College of Information Technology Association (UAEU) | Al Ain, UAE **May 2024 - May 2025**

- Oversaw and drove strategic initiatives for the College's tech community, enhancing academic and extracurricular engagement for over 300 students.
- Coordinated 10+ events and workshops, fostering student involvement and skill development in IT and in areas like programming, cloud, web development, and AI.
- Collaborated with faculty and external partners to secure resources and enhance student opportunities.
