- Dual Enrollment Courses: Intro to AI & ML, Intro to SQL, Intro to Python, Intro to C++, Intro to PL/SQL

Experience

Tribute Labs (ADIN Platform) — Jul. 2025 – Present
Venture Scout

- Sourced early stage AI and blockchain startups with a focus on founder-market fit by performing value proposition analysis, performance forecasting, and valuation modeling.
- Assisted in demoing and refining Tribute Lab's novel AI-first venture model (ADIN), enhancing the performance of VC scouts by leveraging AI agents for in-depth and real-time startup assessments.

Santa Clara University — Jun. 2024 – Present
Undergraduate Research Assistant

- Analyzed $45 billion in illicit blockchain transactions leveraging SQL and Pandas libraries with Professor Seoyoung, Dean of Santa Clara Leavey School of Business, to uncover the patterns and methods of bad actors in Web3.
- Collaborated with CARF and industry experts to propose consent-based blockchain protocols for the Ethereum, Solana, and Stellar blockchains to target money laundering and on-chain financial crime.

Big Time Studios — Jun. 2024 – Sep. 2024
Marketing Analytics Intern

- Cleaned large-scale datasets from X (Twitter), Instagram, and TikTok using analytics techniques to identify user behavior and actionable insights, creating dashboards for the C-Suite that directly informed marketing campaigns.
- Spearheaded a data-driven digital marketing strategy to target trend-responsive content for a crypto-focused social media portfolio with over 1M followers, increasing post engagements by 30% and doubling the follower count.

Paperhands NFTs — Jun. 2022 – Present
Founder

- Founded Paperhands to address predatory practices in the Web3, authoring written educational content around blockchain technology and interviewing 30+ startup founder that attracted 100+ live listeners per episode.
- Minted and sold 2,900 NFTs on the Solana blockchain and fostered a vibrant community of 1,400 crypto enthusiasts, demonstrating digital asset management and end-to-end blockchain deployment expertise.

TajTrader.com — Jun. 2020 – Present
Technical Writer

- Developed a trading methodology combining favorable risk-to-reward technical analysis patterns and indicators with fundamental market analysis to make consistent trading decisions spanning 5+ years of active trading.
- Published trades that transformed $500 to a five-figure portfolio and authored educational content on technical analysis to document the journey of becoming one of the youngest Level 1 Chart Market Technicians.

Projects

Eunoia | *LangChain, Tool Calling, NVIDIA NeMo Agent Toolkit, RAG, Brev.dev* — Aug. 2025 – Present

- Developed an AI-powered journaling platform that transforms unstructured thoughts into actionable and scaled goals using novel tool calling techniques, earning finalist position at NVIDIA's AI Agent Hackathon.
- Created an NLP pipeline with NVIDIA's NeMo Agent, LangChain, and Brev.dev toolkit that identifies key thematic events in journal entries to insight empathetic dialogue and identify high-impact goals.

Munchify | *React, Vertext AI, Firebase, Vercel, Svelte* — Jun. 2025 – Present

- Leveraged Google's Veo3 text-to-video model to create instantaneous and engaging, short form educational content to combat addictive doom-scrollign algorithms.
- Awarded $1,000 at the Laney AI Futures Hackathon to create a social media platform and share generated videos to foster an inclusive environment of intellectual curiosity.
