TOMÁŠ POKORNÝ

Mechanical Engineering | Go-to-Market Strategy | Venture Analysis

Berkeley, CA | tom.pokorny@berkeley.edu | +1 (510) 646-6171 | linkedin.com/in/tpokorny06 | github.com/TomP142

EDUCATION

B.S. Mechanical Engineering, Aerospace concentration | **UC Berkeley, College of Engineering** — Expected 2030

International Baccalaureate Diploma | **Nový PORG, Prague, Czechia** — 2026

- HL: Mathematics AA, Physics, Chemistry | SL: Czech, English, Economics

EXPERIENCE

Go-to-Market Strategist | **SYNHAWK, Prague** | **AI deepfake detection** — May – Aug 2026

- Own the entertainment vertical end to end, covering market sizing, segmentation, positioning and client acquisition
- Co-lead AuralD with engineering and leadership, from market definition to first customer conversations
- Support telecom and banking deployments, including a Vodafone Czech Republic partnership (4M subscribers)

Analyst | **E2MC Ventures, Remote** | **space technology venture capital** — 2023 – 2025

- Screen roughly 25 early-stage space technology companies per month and brief partners on the ones worth diligence
- Support due diligence, translating technical detail into investment reasoning for a non-technical audience
- Built internal automation tooling to triage and track inbound deal flow, cutting manual review time by roughly 50%

Data Analyst | **Zuri, Prague** | **electric VTOL aircraft** — 2024 – 2025

- Processed flight-test telemetry in MATLAB to derive performance metrics used by the test team
- Diagnosed and corrected sensor calibration errors that had been distorting the underlying dataset

LEADERSHIP & PROJECTS

Founder & Team Lead | **PORK Rocket Team** | **Czech Rocket Challenge** — 2024 – 2025

- Led a team of 5 to the Advanced Division final as a secondary-school entrant against university teams
- Directed design, simulation and construction, owning schedule, budget and division of work across the team

Thrust-Vector-Controlled Model Rocket | **Personal project** — 2023 – 2024

- Built airframe, flight computer, and servo-actuated gimbal with active stabilization

RESEARCH

Liquid Rocket Engine Injector Optimization | **Supervised by J. Zemek, Univ. of Oxford** — 2023 – 2026

- Sole author; designed, fabricated and hot-fire tested a bipropellant engine end to end as a secondary-school student
- Parametric SolidWorks model, Python isentropic solver, and 3D combustion CFD across five injector angles
- Presented 1 of 170 talks selected from 512 participants across 39 countries; published in proceedings

MH370 Flap Actuator Failure Analysis | **IB Extended Essay** | **volunteer MH370 search group** — Jan – Aug 2025

- Modeled flap-actuator failure modes in ANSYS; findings fed a paper supporting Ocean Infinity's search

SKILLS

- **Analysis** Excel, PowerPoint, Python, MATLAB, SQL
- **CAD & simulation** SolidWorks, Fusion 360, ANSYS (FEA, CFD), Blender
- **Programming** C++, JavaScript / TypeScript (React), Java, Git
- **Languages** Czech (native), English (fluent), Spanish (limited working)
