# Sissi Xichen Wang

510-646-6792| sissiwang@berkeley.edu | linkedin.com/xichen-wang | xichenwang.com

## EDUCATION

**University of California, Berkeley** — **Berkeley, CA**
*Intended Bachelor of Arts in Neuroscience* — *08/2025 – 05/2029*

- Relevant Coursework: Foundations of Data Science, Structure and Interpretation of Computer Programs, Challenge Lab: Bio-inspired Innovations

**Shenzhen Middle School** — **Shenzhen, China**
*08/2022 – 06/2025*

- GPA: *4.59*

## EXPERIENCE

**Dyscovery** — **China**
*Founder, Executive Director* — *02/2020-present*

- Partnered with 281 urban villages for cognitive/reading training workshops, monthly dyslexia screenings, reaching over 1200 kids.
- Co-developed a multi-dimensional virtual screening tool for dyslexia with Shenzhen Children's Hospital

**TechX Academy** — **Shanghai, China**
*Head Academic Lead of Cognitive Neuroscience* — *03/2025 - 08/2025*

- Designed and organized a 2-week Educational Hackathon on Neural and Cognitive enhancement technology for 100+ teens. Topics include oculomotor motion, neuroeconomics, deep learning, and computer vision.
- Coordinated across academic, outreach, and technical teams and mentored 2 teams in brain-computer interfaces.

**CS Kickstart** — **Berkeley, CA**
*Student* — *08/2025*

- Completed a 1-week CS bootcamp alongside 70 female students, applying Python, machine learning, prompt engineering, web development, and AWS generative AI across collaborative workshops.
- Developed *NotBald!*, a Python game on a software engineer's challenge not to become bald.
- Engaged with Berkeley faculty & industry professionals at Amazon, gaining insight into AI innovation.

**iGEM 2023, 2024, 2025** — **Paris, France**
*Team Leader, Advisor, Mentor* — *03/2023-present*

- Developed a CRISPR/Cas12a-based pathogen detection device(CaPtuRe).
- Optimized a primer screening platform based on the SVM method involving secondary structure consideration, improving the accuracy of performance prediction by 29.66%.
- Conducted primer & crRNA modeling and screening, and the corresponding data visualization.

## PROJECTS

**Melodyslexia: a Functional Music-based Game for Interventions of Developmental Dyslexia** *10/2022-7/2025*

- Designed Logic, coded the game in Cocos 2D, and did UI design.
- Launched the game as a WeChat miniprogram, promoted in 3 clinics and 2 institutions, with 5000+ users.

**SCOLIOSCAN: AI-based scoliosis early screening device** *11/2022-7/2024*

- Developed and validated an AI model to assess scoliosis severity from back movement and posture, using a proprietary dataset from over 5,000 students across 16 schools.
- Utilized Vision Transformers to analyze static and dynamic image data for accurate classification.

**PortALL Escape Rooms: Design for Neurodivergence** *01/2024-07/2024*

- Worked with escape-room managers to add educational elements to escape-room design
- Designed game flow and puzzles with neurological stimuli and incorporated AR elements

## RESEARCH

**Effect of Oculomotor Control and Music Stimuli on Spatial and Language Cognition** **SZU Neurolinguistics Lab**

- Analyzed Event-Related Potentials and the efficacy of oculomotor control in cognitive training

**Exposure to third-hand e-cigarette vapour impairs cognitive function in young mice** **Sun Yat-sen University**
*Ecotoxicology and Environmental Safety, Vol 291, S0147651325002210* *05/2023-02/2025*
*Brian G. Oliver, Jingyu Wang, Rochelle A. Yarak, Tharathip Hikasem, Baoming Wang, Min Feng,* ***Xichen Wang5****, Catherine A. Gorrie, Chenju Yi, Hui Chen*

## SKILLS

**Languages:** Python, JavaScript, C#, HTML/CSS
**Visual:** Touchdesigner, Studio(LEGO), Adobe Illustration
