WORK EXPERIENCE

ByClaros (byclaros.com)

Co-Founder & CTO | Jun 2025 - Present | San Francisco, CA

- Architected and built the full-stack product solo (Next.js/React front end, Python-based AI/ML backend) powering an AI agent that delivers personalized college admissions strategy, gap analysis, and adaptive weekly execution plans
- Drove user acquisition from launch, growing the active user base 350% in the first month through a self-led social media strategy across founder channels reaching 40K+ combined subscribers
- Led investor outreach and relationship management — sourcing, scheduling, and pitching in fundraising meetings — securing $30K in early-stage investment
- Contributed to a data-backed admissions methodology, developed as part of a team effort, that has helped 200+ low-income and first-generation students gain college admission and scholarships
- Owned end-to-end product strategy and execution as sole technical co-founder, balancing engineering, fundraising, and growth in parallel during pre-seed stage

Capital One

Senior Software Engineer | Jan 2025 - Present | Foster City, CA

- Architected and delivered a graph-based semantic search system using **AWS Neptune and Titan embeddings**, powering an org-wide LLM quality aggregation system processing **1M+** records per run.
- Led end-to-end migration of legacy apps to **Next.js, Node.js, TypeScript, and AWS**, delivering **$250K** in annual savings and **99.99%** uptime.
- Automated extraction and analysis of **200K+** PDFs with **98%** accuracy, saving **1,200+** manual labor hours annually.
- Redesigned **LLM** chat interface with **SSE** streaming and custom context management; partnered with ML team on model evaluation and hyperparameter tuning strategy, driving a **35%** improvement in response relevance; experience directly applicable to AI-powered mobile features
- Automated **Terraform IaC** and GitHub Actions **CI/CD** across multi-environment deployments; cut AWS compute costs by **~$150K/yr** and post-deploy defects by **~30%**.
- Designed high-throughput event-driven backend services on **Kubernetes (EKS)** supporting **50K**+ concurrent mobile sessions with real-time data delivery at **sub-100ms** latency

OPSWAT

Software Engineer | Jun 2022 - Jan 2025 | San Francisco, CA

- Took full-stack ownership of customer-facing security analytics dashboard in **React/TypeScript**, reducing page load times by **35%** and improving mobile viewport engagement by **28%**
- Built and optimized **RESTful APIs** serving **20K**+ daily active users with sub-200ms response times at peak load, reducing mobile client-side data fetch failures by **40%**
- Optimized application performance by integrating **Redis** for caching frequently accessed data, reducing database query load by **60%** and improving response times by **45%.**
- Configured **CI/CD** pipelines with Jenkins and GitHub Actions, enabling automated testing and deployment, increasing release frequency by **25%**.

EPAM Systems

Software Engineer | Mar 2020 - Dec 2021 | Minsk, Belarus

- Designed and implemented **RESTful APIs using Express.js** improving data transfer efficiency by 30%, reducing average mobile client response time by 120ms across 3 integrated client platforms
- Integrated **ElasticSearch** for advanced search functionality, resulting in a **200%** increase in product search speed.
- Implemented **WebSocket**-based real-time communication for live chat and notifications.

EDUCATION

University of California, Berkeley

Economics & Data Science | Aug 2026 - Present

Belarusian State Economic University
Bachelor of Data Science and Business Analytics | Sep 2018 - Jul 2021

ADDITIONAL

- **Languages**: Java, Kotlin, Swift, Python, JavaScript, TypeScript, GO, SQL, HTML/CSS
- **AI/ML**: LLM Integration, RAG, Semantic Search, Vector Embeddings, Prompt Engineering, SSE Streaming
- **Mobile & Frontend**: React Native, React.js, Next.js, Redux, Node.js, Django, Express.js
- **Cloud & DevOps**: AWS (Neptune, S3, EKS, EC2, Titan, Bedrock, Polly), Terraform, Kubernetes, Kafka, Docker, GitHub Actions
- **Databases**: PostgreSQL, MySQL, MongoDB, Redis | **Testing**: Jest, Pytest, Selenium
